Experienced computer engineering student recognized for strong organizational skills and a sense of responsibility. Eager to apply technical expertise to make a meaningful contribution in a professional environment. Enthusiastic about expanding knowledge, taking on new challenges, and contributing effectively to team success.

EDUCATION

B.Tech in Computer Science Engineering (Cybersecurity and IoT)

OCT 2022 - JUL 2026

Sri Ramachandra Institute of Higher Education and Research, Porur Chennai

HIGHER SECONDARY EDUCATION

St Britto's Academy, Velachery Chennai

AUG 2020 - MAY 2022

INTERN HISTORY

M/s. Montra Electric, Chennai

17 FEB 2026 - Present

DevOps & Cloud Intern

- Working on Azure DevOps pipelines for CI/CD automation across multiple environments.
- Collaborating on DevOps practices integration with cybersecurity workflows.
- Monitoring, debugging, and improving deployment efficiency.

M/s. Hinduja Tech Chennai

26 AUG 2024 - 28 SEPT 2024

Enhancing Web Application Security — Vulnerability Assessment & Penetration Testing

- Conducted automated vulnerability assessment and penetration testing on web applications using Acunetix.
- Identified security vulnerabilities and produced detailed reports with remediation recommendations.

M/s. Bharat Heavy Electricals Ltd. (BHEL), Malleswaram, Bengaluru

19 FEB 2024 - 30 MARCH 2024

Visitor Manager System

- Developed a Visitor Manager System using ASP.NET MVC and Entity Framework.
- Designed backend database schema with SQL Server for efficient data management.

M/s. Ashok Leyland Ltd., Technical Centre, Product Development, Chennai

05 MAY 2023 - 28 JUNE 2023

Automation of Data Quality Analysis of IoT Device (Telematics)

- Automated data quality analysis for IoT telematics devices, reducing manual inspection effort.
- Developed Python scripts using Pandas and NumPy for data validation and anomaly detection.

CORE SKILLS

Cybersecurity and DevOps

- VAPT (Vulnerability Assessment and Penetration Testing)
- Networking Fundamentals
- Developed a project integrating DevOps practices with cybersecurity measures
- Implemented CI/CD pipelines using Azure DevOps
- Applied concepts of cloud infrastructure and automation

Web Development

- Frontend: HTML, CSS, JavaScript, React.js
- Backend: ASP.NET MVC, Entity Framework, Node.js, Express.js
- Database: SQL Server, MongoDB

Internet of Things (IoT)

- Arduino
- Raspberry Pi

Data Analysis

- Data Analysis & Algorithms
- Data Visualization: Tableau

Programming Languages

- Python: NumPy, Pandas, Matplotlib, Seaborn

FURTHER INFORMATION

LANGUAGES

- Saurashtra (Native or Bilingual Proficiency)
- English (Fluent)
- Tamil (Fluent)

CERTIFICATIONS

- Certified in Data Visualization using Tableau
- Forage Cybersecurity Job Simulation (Mastercard, Deloitte Australia, and Tata)
- Introduction to the Dark Web, Anonymity, and Cryptocurrency (CodeRed)
- CICSA - Certified IT Infrastructure and Cyber SOC Analyst
- Red Team Hacker - Ongoing
- SOC Program - Foundations Training (Microsoft)

PROJECTS DONE

- Online Gift Store with Invoice Generation.
- Conducted automated vulnerability assessment on a deliberately vulnerable website using Acunetix, generated detailed reports, and recommended security improvements.
- Smart Gas Leakage Detector using Arduino.
