Experienced computer engineering student recognized for strong organizational skills and a sense of responsibility. Eager to apply technical expertise to make a meaningful contribution in a professional environment.

Enthusiastic about expanding knowledge, taking on new challenges, and contributing effectively to team success.

EDUCATION

B.Tech in Computer Science Engineering (Cybersecurity and IoT)

Sri Ramachandra Institute of Higher Education and Research,
Porur Chennai

OCT 2022 - JUL 2026

HIGHER SECONDARY EDUCATION

St Britto's Academy
Velachery Chennai

AUG 2020 - MAY 2022

INTERN HISTORY

M/s. Ashok Leyland Ltd., Technical Centre, Product Development, Chennai.

Automation Of Data Quality Analysis of IoT Device (Telematics)

05 MAY 2023 - 28 JUNE 2023

M/s. Bharat Heavy Electricals Ltd., (BHEL), Malleswaram, Bengaluru

Visitor Manager System Developed using ASP.NET MVC and Entity Framework

19 FEB 2024- 30 MARCH 15 2024

M/s. Hinduja Tech Chennai

Enhancing Web Application Security Vulnerability Assessment & Penetration Testing with the
Acunetix website.

26 AUG 2024 - 28 SEPT 2024

M/s. Montra Electric, Chennai

DevOps & Cloud Intern

Working on Azure DevOps pipelines for CI/CD automation

Collaborating on DevOps practices integration with cybersecurity workflows

Monitoring, debugging, and improving deployment efficiency

17 FEB 2026–Present

TECHNICAL SKILLS

Cybersecurity & DevOps: VAPT (Vulnerability Assessment and Penetration Testing), Networking Fundamentals, CI/CD Pipelines, Azure DevOps, Cloud Infrastructure, Automation

Web Development: HTML, CSS, JavaScript, React.js, ASP.NET MVC, Node.js, Express.js, Entity Framework

Database: SQL Server, MongoDB

IoT: Arduino, Raspberry Pi

Data Analysis & Visualization: Data Analysis, Algorithms, Tableau

Programming Languages & Libraries: Python, NumPy, Pandas, Matplotlib, Seaborn

SOFT SKILLS

- Analytical Problem-Solving and Critical Thinking
- Strong Communication and Presentation Skills
- Hardworking and Dedicated Until Task Completion
- Adaptability to New Technologies and Tools
- Accountability, Ownership, and Time Management

ACADEMIC PROJECTS

Online Gift Store with Invoice Generation

Developed a full-stack e-commerce web application using React.js for purchasing customized gifts with secure order management and automated invoice generation.

Designed responsive and user-friendly frontend interfaces using React.js, HTML, CSS, and JavaScript to enhance customer experience and smooth navigation. Integrated backend functionalities for product management, order tracking, and customer data handling while optimizing checkout workflow and database connectivity for improved application performance.

Vulnerability Assessment using Acunetix

Performed automated vulnerability assessment on a deliberately vulnerable web application using Acunetix security scanner to identify security weaknesses and web vulnerabilities such as SQL Injection and Cross-Site Scripting (XSS).

Generated detailed vulnerability assessment reports with severity classification and remediation recommendations to improve application security posture. Gained practical exposure to penetration testing methodologies, vulnerability analysis, and web application security concepts.

Smart Gas Leakage Detector using Arduino

Developed an IoT-based Smart Gas Leakage Detection System using Arduino and gas sensors for real-time environmental monitoring and hazardous gas detection.

Implemented automated alert mechanisms using buzzers and notification systems to improve safety and prevent accidents during emergency situations. Enhanced understanding of embedded systems, sensor integration, IoT architecture, and hardware-software communication through practical implementation

CERTIFICATION & ACHIEVEMENTS

Certified in Data Visualization using Tableau, focusing on dashboard creation and visual analytics.

Forge Cybersecurity Job Simulation in Mastercard, Deloitte Australia, and Tata, gaining exposure to SOC operations and incident response.

CodeRed Certification in Introduction to the Dark Web, Anonymity, and Cryptocurrency.

CICSA – Certified IT Infrastructure and Cyber SOC Analyst Red Team Hacker (Ongoing), focused on SOC analysis and penetration testing.

Microsoft SOC Program – Foundations Training, covering threat monitoring and security operations concepts.
